

COMPANY PROFILE

"Geeta International takes pride in being a distinguished name in the realm of masterbatch manufacturing. With a strong commitment to quality and innovation, we have emerged as a leading provider of custom masterbatch solutions tailored to meet the diverse needs of industries worldwide.

State-of-the-art manufacturing facilities and a team of experienced professionals, enable us to produce a comprehensive range of masterbatches, including colorants, additives, and specialty compounds.

At Geeta International, we understand the importance of color accuracy, performance enhancement, and regulatory compliance in plastic manufacturing processes. That's why we meticulously formulate each batch to deliver consistent quality and reliability, empowering our clients to achieve their desired product specifications. Whether it's enhancing the visual appeal of consumer goods or improving the functionality of industrial components, our masterbatch solutions stand as a testament to our dedication to excellence. Partner with Geeta International and experience the difference that superior masterbatch solutions can make in your production processes."

OUR MISSION

To provide plastic processing industries with best possible solution with respect to clients need and add value in their products

OUR VISION

Continuous innovation in quality and product to attain perfection in offering masterbatch

COMPETITIVE ADVANTAGE

 Excellent Dispersion

 Excellent Processibility

 Better Production Flexibility

 Cost Saving Due To Low Addition Level

TECHNICAL EXPERTISE

- ✓ Research & Development
- ✓ Colour Center & Services
- ✓ Addictive Center & Services
- ✓ Technical Services & Application

Our team concentrates on selecting the right raw materials and using cutting-edge technology in conjunction with a skilled workforce to produce immaculate products that will satisfy every consumer.

Perfect mixing techniques along with the right choice of pigments, additives, and carrier base will result in perfection with quality at efficient rates. Made with premium pigments and an excellent mixing technique, it offers the best quality and color specification consistency from batch to batch.

Our quality controllers thoroughly inspect this product using a variety of quality standards and tools to guarantee a flawless delivery to clients.

Fulfill Customer's the needs and expectations.

Continuous research and development is conducted on a variety of products to create better products for consumers.

To ensure a consistent level of product quality, quality control tests are carried out on a regular basis.

PRODUCT DIVERSITY

WHITE MASTERBATCH

White Masterbatch has been growing continuously and has an unlimited potential in the market. Therefore, in order to meet client expectations, we keep updating our products by using the right amount of Additives & best quality Titanium Dioxide which is the most essential ingredient for the production of all White Masterbatch.

Our expert team is specially committed for various range of White Masterbatch consists of a wide selection of custom made and innovative whites with or without fillers or with additional agents like UV or thermo stabilizer best rates in the market.

White Masterbatches are available in PE, PP, EVA, ABS, PC, PET, PS and NYLON base resins for various applications.

APPLICATIONS

Cast & BOPP Film

Blown Film
(Mono & Multi Layer)

Extrusion coating film

Blow Moulding

Injection moulding,
Roto moulding

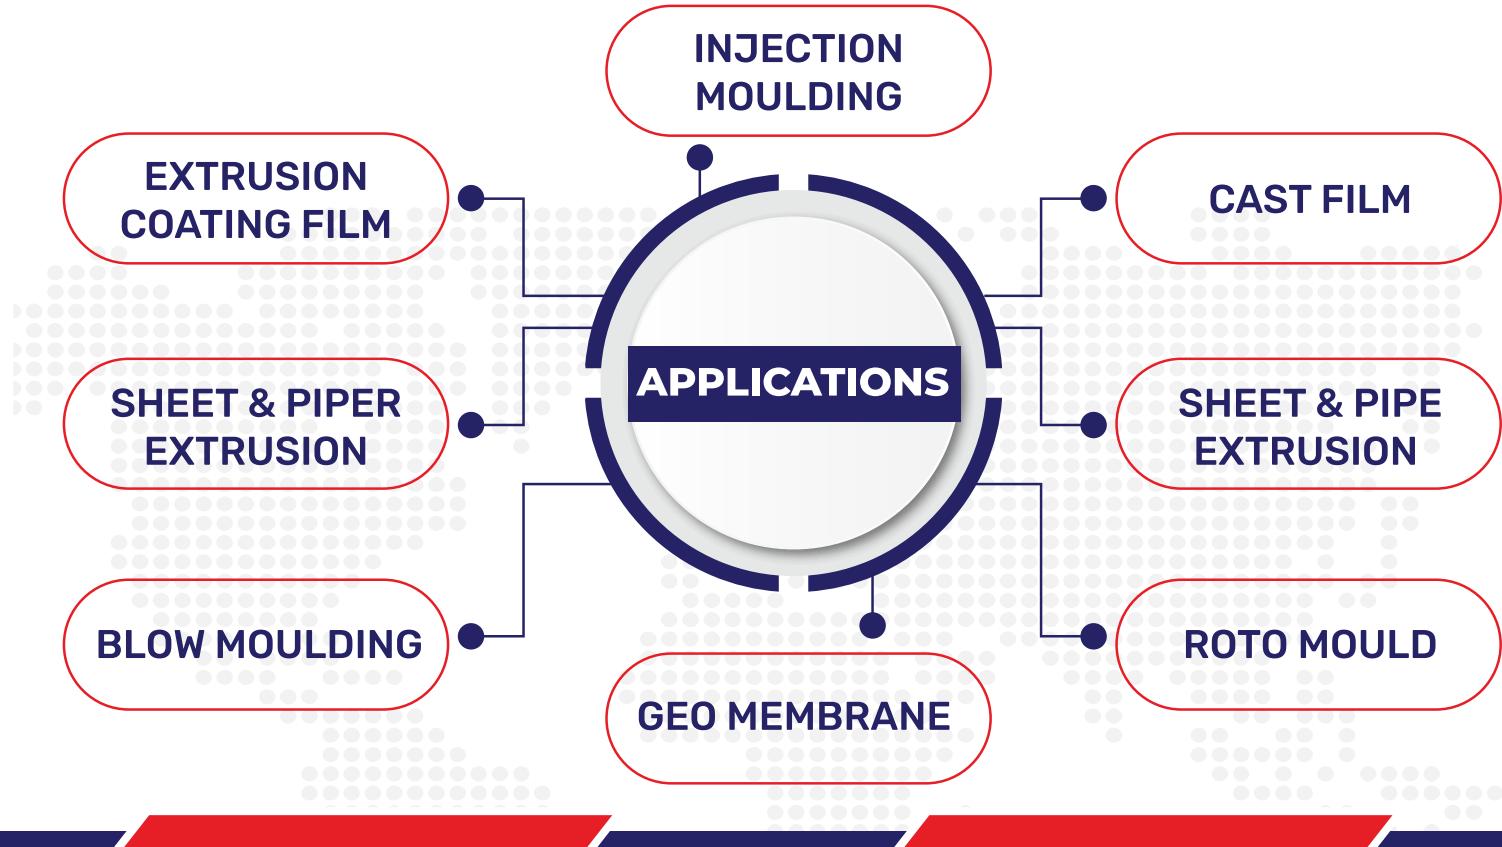

Sheet extrusion

BLACK MASTERBATCH

We offers a vast range of Black Masterbatch with different Carbon Black concentrations that can accommodate a range of customer requirements on black jetness process and applications.

Black Masterbatches are available in PE, PP, EVA, ABS, PC, PET, PS and NYLON base resins for various applications.

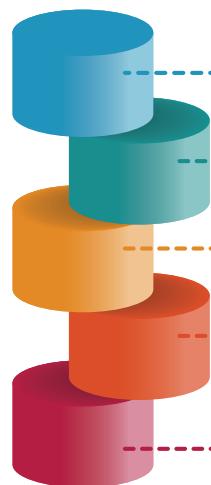

COLOR MASTERBATCH

Colour Masterbatches are plastic additives that impart a range of hues and textures to finished goods. Our Color Masterbatch formulations are meticulously crafted to meet the diverse needs of industries. With precise color matching and consistent dispersion, our Master batches ensure vibrant and uniform coloration, enhancing the aesthetic appeal of the product. It is used in several sectors, including plastics manufacturing, the automobile industry, and aerospace, injection blow moulding, roto moulding industries.

SALIENT FEATURES

- Excellent Dispersion
- High Brightness
- Low Dosage Ratios
- High Heat Stability and Light Fastness
- Customised Solutions

INDUSTRY

- Wire and Cable
- Packaging
- Consumer and Household
- Agriculture and Horticulture
- Textile / Mono filament
- Pharma and healthcare

SPECIAL EFFECT

Fluorescent, Luminescent, Marble effect, Metallic effect, Pearlescent speckle, Fleck, Wood effect

ADDITIVES

>> Anti - Ripening Agent	Slip Agent <<
>> Anti-Microbial, Anti-Fungal	Optical Brighter <<
>> Oxo- Biodegradable	Rodent Repellent <<
>> Anti-Fog	Ant Cum Termite Repellent <<
>> Odour Remover	Flame Retardant <<
>> Anti-Static	UV Stabilizer <<
>> Anti Oxidant	Polymer Processing Aid <<
>> Anti-Scratch	Glow in Dark <<

FILLER MASTERBATCH

We have extensive range opaque and transparent grade filler mineral filled masterbatch with high level of dispersion. These are specially designed by blending polyolefin's with ultrafine calcium carbonate in the compounding extrusion. These filler masterbatches improves physical properties of polymers, acts as cost effective with higher loadings.

KEY ADVANTAGES

- ✓ Cost reduction
- ✓ Imparts slip properties
- ✓ Enhances dart, drop and tear resistance
- ✓ Improves printability, barrier properties,
- ✓ dimensional stability, rigidity and impact strength
- ✓ Increases the output
